# How to Install your Royal Paw Dog Tie-out Stake

**ROYAL PAW**  
TREAT YOUR PET LIKE ROYALTY

# Inspection

## Part 1:

Make sure your Royal Paw Dog Tie-Out Stake kit has all the included items:

1. Ground Stake
2. EZ-Lever Installation Tool
3. Carabiner Clip
4. Royal Brush
5. Duffel Carry Bag

Note: Some accessories might be stored within the Duffel Carry Bag's pouch.

## Part 2:

Visually inspect the ground stake and its accessories for any defects. Be sure to pay extra attention to the loose metal ring attached at the top of the stake. Your leash or tie-out will clip directly on to this metal ring so it is important to double check.

Our quality control team does a great job inspecting our anchors for defects. If for any reason you believe we missed one, please contact us at [support@shoproyalpaw.com](mailto:support@shoproyalpaw.com) and we will make it right. Remember that your purchase comes with a one-year satisfaction guarantee. Please feel free to email us with any questions or concerns.

**Safety, security, and satisfaction is our goal!**

# Installation

## Step 1:

Find a piece of land with a big enough open space to place your anchor. The space will depend on how long your leash or tie-out cable is.

This first step is important in order to prevent your dog from getting caught on something and entangling themselves.

# Installation

## Step 2:

With the ground stake on hand, place it vertically (spiral-tip side down) into the ground.

Lightly push the stake in while twisting the anchor in the clockwise direction.

You will notice that it will grab onto the earth and begin burying itself with each twist.

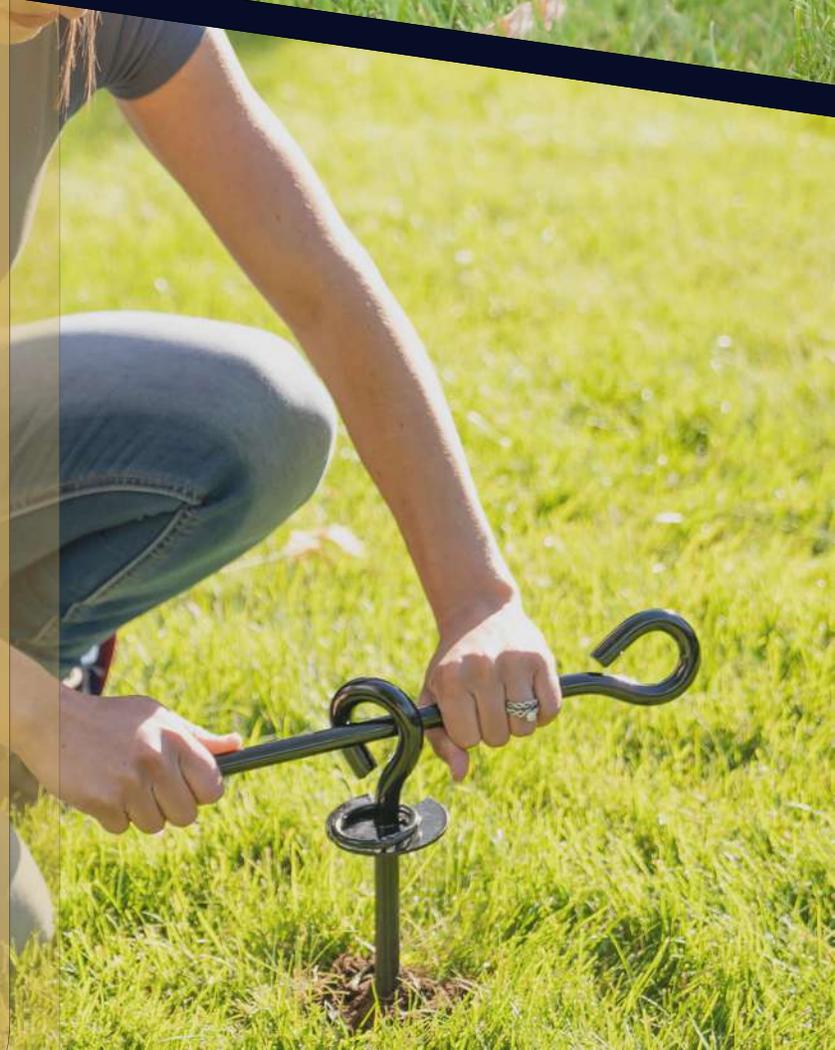

## Step 3:

Some soils are more difficult to install into than others. If you find yourself in this situation then the EZ-Lever installation rod is your friend.

Take the EZ-Lever rod and poke it through the eyelet of the ground stake. Depending on your preference you can either go through half-way or all the way through.

Place one hand at each end of the EZ-lever rod and begin twisting in the same clockwise direction while lightly pushing into the ground. Keep going until the stake's flat disc is flush with the ground's surface. Once there, give the stake a couple of more rotations to ensure you have a snug fit.

**Note:** You do not need to push hard into the ground, a majority of the leg work is being done thanks to the spiral-drill tip and curved double blade design. All you need to do is twist!

# Installation

## Step 4:

Take one end of your tie-out cable and clip it onto the loose metal ring. The other end of the cable is for your dog.

If you do not have a tie-out cable and only have your dog's regular leash, don't worry! We made sure to include a handy carabiner clip.

Be sure to clip the carabiner onto the leash (where your hand usually holds the leash) and once that step is done, hook and clip the carabiner to the loose metal ring of the ground stake.

Your assembly should be as follows:

Anchor > Carabiner > Leash > Dog

**Note:** We recommend your dog wear a harness when clipping them on to the ground stake to prevent any unnecessary choking if they pull.

## Step 5:

Run around and be hands-free with your canine friend knowing that they will be safe and securely attached to your Royal Paw Dog Stake.

Some of the things you can do with your pup while they are attached to the Royal Paw Dog Stake:

1. If your cable or leash is long enough, run around and play fetch!
2. Have a picnic without worrying about your pup darting off!
3. Go camping with the freedom of going in and out of tents!
4. Train your dog while using both of your hands! Perfect for puppies learning to be in public.
5. Need to use the restroom and don't have anywhere to tie your pooch onto? Use the tie-out stake!
6. Briefly leave your dog outside on the yard without them wandering off!
7. Summertime tanning? Lay back and relax knowing your pup won't leave you behind!
8. At the beach? Install and have the peace of mind that they won't go for a swim without you!
9. At a kids sporting event? Cheer on with both hands with your pup by your side!
10. Gift another dog-lover a Royal Paw Dog Stake while using your Royal Paw Dog Stake at the same time!

# Uninstallation

When you are done using your Royal Paw Dog Stake, uninstalling it is a breeze! Simply reverse the steps you performed during the installation. Twist the stake counter-clockwise while lightly pulling up and away from the ground.

Refrain from yanking the anchor straight out as this will likely form a hole. If a hole forms anyway, use the EZ-Lever rod to loosen the surrounding soil and use it to fill the hole. Press firmly with your foot to compact.

Clean off any excess dirt or debris off the ground stake using the included cleaning brush to get rid of any gunk before storing everything away in your Royal Paw Duffel.

**Voila! You have now successfully used your Royal Paw Dog Tie-Out Stake!**
